* Semi-standard

12 DCV

7* 240 VAC, 50/60 Hz

.

With surge voltage suppressor

None

With surge voltage suppressor

(Grommet type only)

With light/surge voltage suppressor

(DIN terminal type only)

Manifold

Model	Applicable manifold type	Accessories
VO307□(-Q)	Common or individual exhaust	Function plate (DXT152-14-1A) Note) Mounting screw (NXT013-3)

Option

<u> </u>	
Description	Part no.
Bracket	DXT152-25-1A (With screw)

VT307 Series

Standard Specifications

Type of actuation		Direct operated type 2 position single solenoid					
Fluid		Air					
Operating pressure range	0 t	0 to 1 MPa (High-pressure type), 0 to 0.7 MPa (Standard type)					
Ambient and fluid temperature	Э		−10 to 50°C (No freezing)				
Response time Note 1)			20 ms or less (at 0.5 MPa)				
Max. operating frequency			10 Hz				
Lubrication	No	ot required	d (Use turbine oil Class 1 ISO VG32, if lubricated.)				
Manual override			Non-locking push type				
Mounting orientation			Unrestricted				
Impact/Vibration resistance No	te 2)	150/50 m/s ²					
Enclosure		Dustproof					
Electrical entry			Grommet, DIN terminal				
Coil rated voltage (V)	AC (5	0/60 Hz)	100, 200, 110*, 220*, 240*				
Coll rated voltage (v)		DC	24, 12*				
Allowable voltage fluctuation			-15 to +10% of rated voltage				
Apparent power Note 3) Note 4)		Inrush	12.7 VA (50 Hz), 10.7 VA (60 Hz)				
Apparent power ******	AC	Holding	7.6 VA (50 Hz), 5.4 VA (60 Hz)				
Power consumption Note 3) Note 4)	-	DC	Without indicator light: 4 W, With indicator light: 4.2 W				
Light/Surge voltage suppressor		AC	Varistor, LED				
(DIN terminal type only)		DC	Diode, LED

Note) Values for a single valve unit. It is not applicable to the manifold. Refer to the manifold specifications on page 1247.

Valve Options

Continuous duty type: VT307E

Exclusive use of VT307E is recommended for continuous duty with long time loading.

⚠ Caution

- This model is for continuous duty, not for high cycle rates.
- 2. Energizing solenoid should be done at least once in 30 days.

Specifications different from standard are as follows							
Apparent power/	Inrush 7.9 VA (50 Hz), 6.2 VA (60						
AC	Holding	5.8 VA (50 Hz), 3.5 VA (60 Hz)					
Power consumption/DC	1.8 W, With indicator light: 2 W						
Response time Note) 30 ms or less (at 0.5 MPa)							
Note) Refer to Note 1) of the standard specifications							

Energy-saving type: VT307Y (VT307W)

If low power consumption is required for electronic control, "VT307Y(W)" (1.8 W) is recommended.

Specifications different from standard are as follows.

Power consumption/DC | 1.8 W, With indicator light: 2 W |
Response time Note | 25 ms or less (at 0.5 MPa)

Note) Refer to Note 1) of the standard specifications.

Vacuum spec. type: VT307V (VT307W)

This vacuum model has less air leakage than the standard model under low pressure. It is recommended for vacuum application.

⚠ Caution

Since this valve has slight air leakage, it can not be used for vacuum holding (including positive pressure holding) in the pressure container.

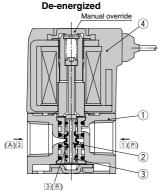

Specifications different from standard are as follows.

Operating pressure range -101.2 kPa to 0.1 MPa

3 Port Solenoid Valve VT307 Series **Direct Operated Poppet Type**

Construction

Operation principle <De-energized>

Poppet valve 2 is pushed upward by the return spring 3, port 1 is closed. Then, port 2 and port 3 are connected. Air flow direction:

Material

Port $1 \leftrightarrow Block, 2 \leftrightarrow 3$

Component Parts Body

Description

Poppet valve

How to Use DIN Terminal

- 2) Pull the screw 1 out of the housing 2 3) On the bottom part of the terminal block 3, there's a cut-off part (9). If a small flat head screwdriver is inserted between the opening in the bottom, terminal block 3 will be removed from the housing 2.
- 4) Remove the cable gland (4), plain washer (5) and rubber seal 6.

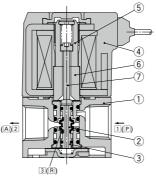

2. Wiring

- 1) Pass the cable 7 through the cable gland 4, plain washer 5 and rubber seal 6 in this order, and then insert them into the housing 2.
- 2) Loosen the screw (1) attached to the terminal block 3. Then, pass the lead wire 10 through the terminal block 3 and tighten the screw 1 again. Note 1) Tighten within the tightening torque of 0.5 N·m ±15%.
 - Note 2) Cable 7 outside diameter: ø6 to ø8 mm (ø4.5 to ø7 mm for CE/UKCA-compliant products)
- Note 3) Crimped terminal like round-shape or Y-shape cannot be used

Connector for DIN Terminal, Gasket

Description	ription Part no.		
DIN connector	B1B09-2A (Standard)		
	GM209NJ-B17 (CE/UKCA-compliant)		
Gasket	CAXT623-6-7-12 (Standard)		
	CAXT623-6-7-11 (CE/UKCA-compliant)		

Energized

<Energized>

When energizing the molded coil 4, the armature 5 is magnetically attracted to the core 6 and through the push rod ⑦, it pushes down the poppet valve ② and port ③ is closed. Then, port 1 and port 2 are connected. At this time, there will be gaps between the armature (5) and the core 6, but the armature 5 will be magnetically firmly attracted to the core 6. Air flow direction:

Port 1 ↔ Port 2, Port 3 ↔ Block

Aluminum die-casted	Color: White
Aluminum, HNBR	
Stainless steel	
Resin	

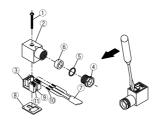

3. Assembly

Note

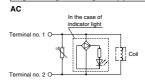

- 1) Pass the cable 7 through the cable gland 4, plain washer 5 and rubber seal 6 in this order and connect to the terminal block (3). Then, mount the terminal block (3) on the housing (2).
 - (Push it down until you hear the click sound.)
- 2) Put the rubber seal 6 and plain washer 5 in this order into the cable entry of the housing 2, and then tighten the cable gland 4 securely
- 3) Insert the gasket (8) between the bottom part of terminal block $\ensuremath{\mathfrak{G}}$ and the plug attached to the equipment. Then, screw in 1) from the top of the housing 2 to tighten it.
 - Note 1) Tighten within the tightening torque of 0.5 N·m ±20%.

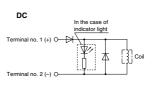

Changing the entry direction

The orientation of a connector can be changed 180°, depending on the combination of a housing 2 and a terminal block (3)

Light/Surge Voltage Suppressor

Electrical Connection

DIN terminal is connected inside as in the figure below. Connect to the corresponding power supply.

DIN terminal block

	Terminal no.	1	2
	DIN terminal	+	-
4			

· Applicable cable O.D. ø6 to ø8 (ø4.5 to ø7 mm for CE/UKCA-compliant products)
